PROJECTS

- **Hand Tracking** - python based Application that helps you to use gesture control to change the volume of a computer. It is made using python and other libraries of it. [Link: https://github.com/Rushabh-77/my-projects/tree/main/Hand%20Tracking](https://github.com/Rushabh-77/my-projects/tree/main/Hand%20Tracking)
- **Attendance Project** - python based attendance project that will use webcam to detect faces and record the attendance live in an excel sheet. [Link: https://github.com/Rushabh-77/my-projects/tree/main/ImagesAttendance/Attendance_Software](https://github.com/Rushabh-77/my-projects/tree/main/ImagesAttendance/Attendance_Software)
- **Billing Software** - System allows inserting the customer's name, and, then the user can simply enter the item's name and quantity he/she wants. After selecting all the product items, the system calculates the total payable bill and the system automatically creates an invoice receipt in a .txt format.
